

Experiment-1:

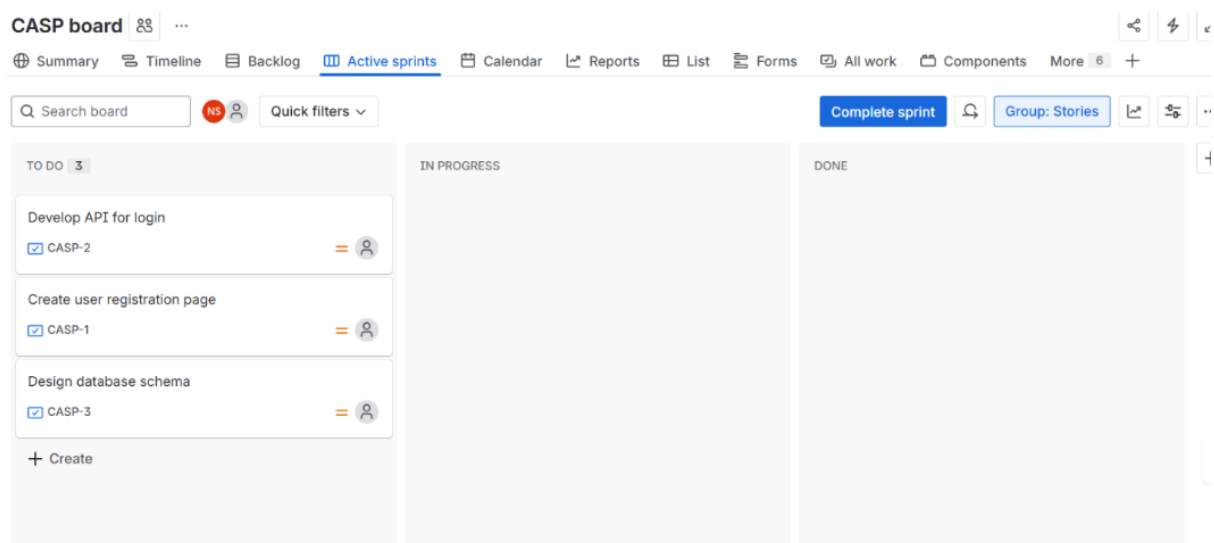

Experiment-02

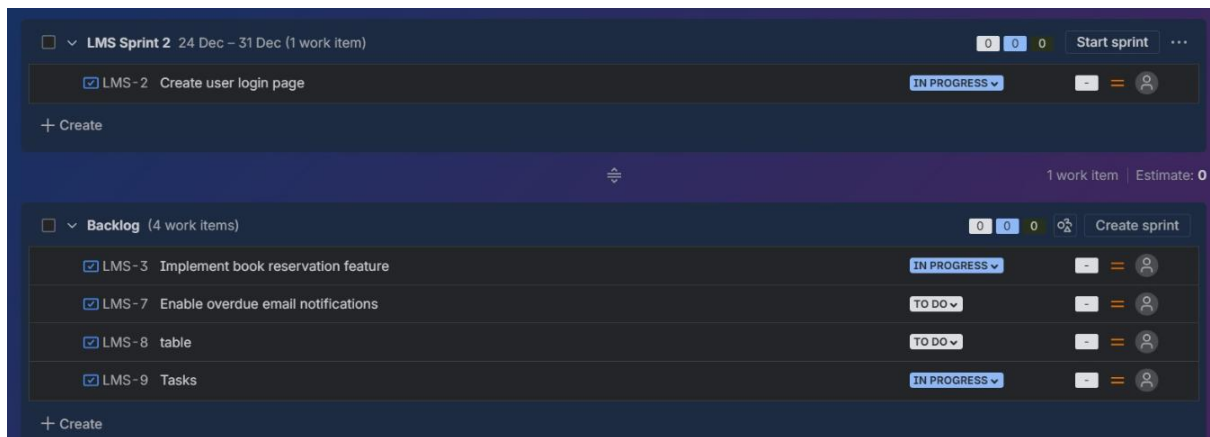

Experiment-03

Experiment-04

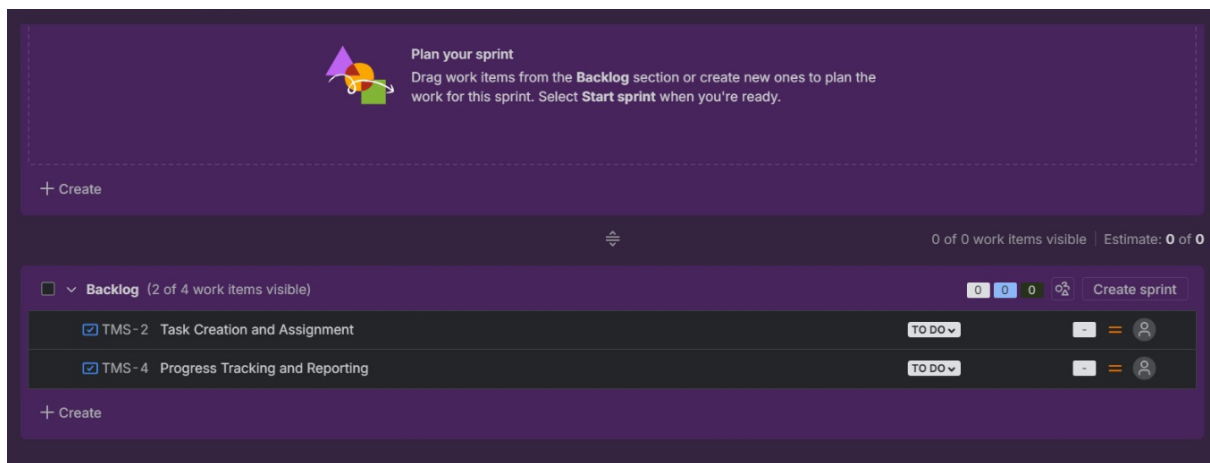

Experiment-06:

This screenshot shows the Jira Backlog for 'LMS Sprint 2' (24 Dec - 31 Dec) with 1 work item. The sprint summary bar at the top shows 0 To Do, 0 In Progress, and 0 Done items, with a 'Start sprint' button. Below, the backlog contains one item: 'LMS - 2 Create user login page', which is currently 'IN PROGRESS'. A '+ Create' button is visible at the bottom left.

Item	Status
LMS - 2 Create user login page	IN PROGRESS

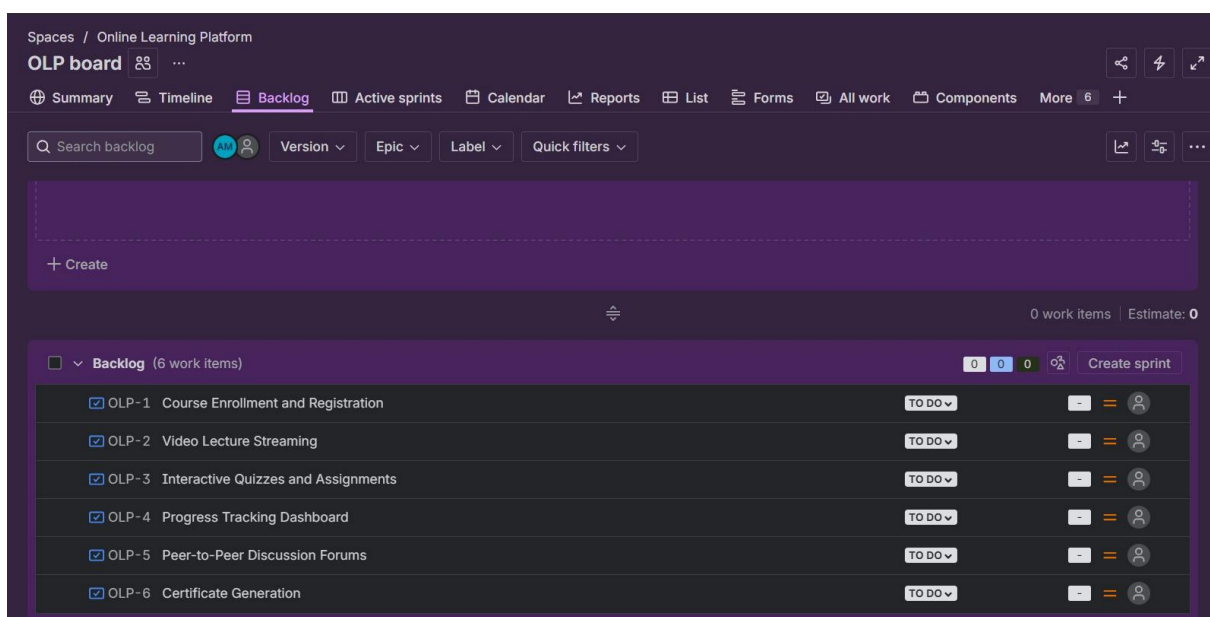

Experiment-07:

This screenshot shows the Jira Backlog for 'TMS' with 2 of 4 work items visible. A 'Plan your sprint' instruction box at the top explains that items can be dragged from the backlog to plan a sprint. The sprint summary bar shows 0 To Do, 0 In Progress, and 0 Done items, with a 'Create sprint' button. The backlog lists two items: 'TMS - 2 Task Creation and Assignment' and 'TMS - 4 Progress Tracking and Reporting', both with a 'TO DO' status. A '+ Create' button is at the bottom left.

Item	Status
TMS - 2 Task Creation and Assignment	TO DO
TMS - 4 Progress Tracking and Reporting	TO DO

Experiment-08:

This screenshot shows the Jira Backlog for the 'OLP board' (Online Learning Platform) with 6 work items. The top navigation bar includes links to Summary, Timeline, Backlog (active), Active sprints, Calendar, Reports, List, Forms, All work, Components, and More. A search bar and filter buttons (Version, Epic, Label, Quick filters) are present. The sprint summary bar shows 0 To Do, 0 In Progress, and 0 Done items, with a 'Create sprint' button. The backlog lists six items, all with a 'TO DO' status: 'OLP - 1 Course Enrollment and Registration', 'OLP - 2 Video Lecture Streaming', 'OLP - 3 Interactive Quizzes and Assignments', 'OLP - 4 Progress Tracking Dashboard', 'OLP - 5 Peer-to-Peer Discussion Forums', and 'OLP - 6 Certificate Generation'. A '+ Create' button is at the bottom left.

Item	Status
OLP - 1 Course Enrollment and Registration	TO DO
OLP - 2 Video Lecture Streaming	TO DO
OLP - 3 Interactive Quizzes and Assignments	TO DO
OLP - 4 Progress Tracking Dashboard	TO DO
OLP - 5 Peer-to-Peer Discussion Forums	TO DO
OLP - 6 Certificate Generation	TO DO

Experiment-09:

The screenshot shows the GitHub repository page for 'hellogitworld', which is a public repository forked from 'githubtraining/hellogitworld'. The repository is currently on the 'master' branch, which is up to date with the upstream 'master' branch. The repository has 2 branches, 0 tags, and 26 commits. The repository is owned by 'Jordan McCullough'. The repository's description is 'Hello Git World sample training repository'. The repository's README file is visible, showing the repository's purpose and instructions. The repository's files and folders are listed on the left, including 'resources', 'src', '.gitattributes', '.gitignore', '.travis.yml', 'README.txt', 'build.gradle', 'fix.txt', and 'pom.xml'. The repository's activity is shown on the right, including the commit history and the list of contributors.

File	Commit Message	Commit Date
resources	Addition of the README and basic Groovy source samples.	14 years ago
src	Update package name, directory	11 years ago
.gitattributes	.gitattributes to make this play nicely on Windows	13 years ago
.gitignore	Adding maven build script	13 years ago
.travis.yml	Fix YAML, name-value pair missing space	11 years ago
README.txt	Even I can change the readme file	12 years ago
build.gradle	Added gradle build file	13 years ago
fix.txt	Fixes githubtraining#1	13 years ago
pom.xml	Fix groupid after package refactor	11 years ago

Experiment-10:

The screenshot shows the GitHub repository page for 'hellogitworld' with the 'README.txt' file selected. The file is owned by 'PeterBell' and was last committed 12 years ago. The file's content is displayed in the main area, showing the repository's purpose and instructions. The file's metadata is shown at the top, including the commit hash 'a13db1' and the commit date '12 years ago'. The file's content is displayed in a code editor, showing the repository's purpose and instructions. The file's content is as follows:

```
1 This is a sample project students can use during Matthew's Git class.
2
3 Here is an addition by me
4
5 We can have a bit of fun with this repo, knowing that we can always reset it to a known good state. We can apply labels, and branch, then add new code and merge it.
6
7 As a quick reminder, this came from one of three locations in either SSH, Git, or HTTPS format:
8
9 * git@github.com:matthewmccullough/hellogitworld.git
10 * git://github.com:matthewmccullough/hellogitworld.git
11 * https://matthewmccullough@github.com:matthewmccullough/hellogitworld.git
12
13 We can, as an example effort, even modify this README and change it as if it were source code for the purposes of the class.
14
15 This demo also includes an image with changes on a branch for examination of image diff on GitHub.
```
